VOLUME 2 ISSUE 1

FEBRUARY 2011

## HAPPY NEW YEAR

Well here we are into another year already. We trust you all had a safe and happy Christmas and enjoyed the New Year celebrations. Many thanks to the crew at RME for making 2010 a successful year and also to our existing Pool Companies who keep us digging all year round. We attended a few Christmas parties in December and shared a few bourbons with our Industry friends and associates. Its always a great way to wind down the year and socialise with our co-workers. Here's to a happy 2011.

The Mean Fiddler**

## Crystal Pools Christmas Party Celebration.....

During December we headed to a few Christmas parties and caught up with our friends & work-mates for a drink or two. Crystal Pools invited us to join their celebrations held at PJ Gallaghers in Parramatta. A great night of socialising was had by all.

or is it...

Rick, Mick & Nick..

After a few drinks, it didn't really matter.....

## CTPF installs for New years Eve

Complete Temporary Pool Fencing installed panels for the 3rd year at The Sydney Botanic Gardens for the New Years Eve celebrations ensuring the inebriated didn't fall into the ocean. Specially designed braces are used to hold the panels on the 45 deg hills.

# Rick joins film crew in Tamworth for The Country Music Festival

During the month of January, The annual Country Music festival is held in Tamworth. This year Rick Murray was invited to join Skip Film Productions to assist with the filming of some of Australia's great Country Music artists. Rick spent 4 days on location even taking a ride in a helicopter to capture some aerial shots of Tamworth. The crew interviewed several artists including Adam Brand, James Blundell, Wendy Matthews &

Adam Harvey to name a few. The RME hummer was once again an icon with many fans lining up for photographs. Rick would like to thank Noel Sadler (Skip Film Productions) for the invitation to be part of the crew for this amazing event.

# On the Job...

RME was contracted by Aqua Leisure Pools to replace a retaining wall using sandstone blocks 3.5m x 1.5m x 1m in size. The wall had to be built 6 metres below ground level requiring a 14 ton excavator to remove the dirt allowing the blocks to be placed. A rock saw was used to cut the blocks into smaller sizes with the 14 tonner shifting them to the lower ground. On completion, agg line and mesh was placed for drainage then back filled with aggregate.

Existing retaining wall falling down

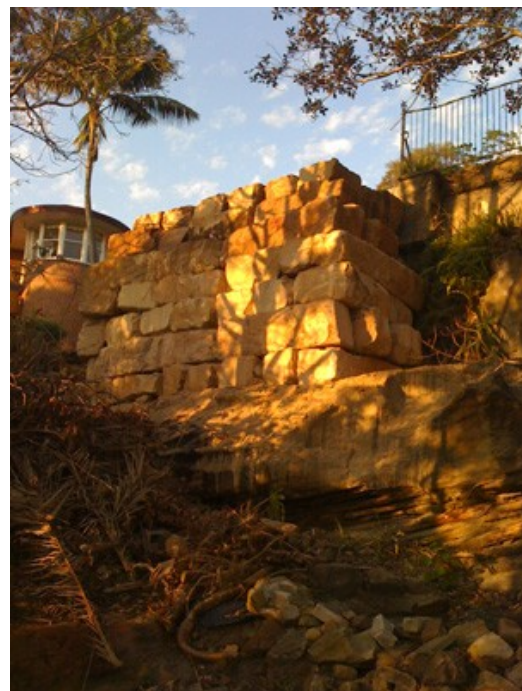

Sandstone blocks delivered

Placement of sandstone blocks

The excavation 6 metres below ground level

The finished retaining wall..

It was built for structural not cosmetic reasons and is not visible.
